DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21, drawn to a supercapacitor and a method for making, classified in class 361, subclass 271.
 - II. Claims 22-39, drawn to a method for making a supercapacitor, classified in class 29/25.03.
 - III. Claims 40-58, drawn to a method for making a photovoltaic device, classified in class 438, subclass 57.
 - IV. Claims 59-67, drawn to a photovoltaic cell, classified in class 136, subclass 252.
 - V. Claims 68-77, drawn to a system for making photovoltaic cells, classified in class 118, subclass 620.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and II and Groups III, IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. Groups I and II claim an energy storage device. Groups III, IV and V claim a method for making an energy conversion device, an energy conversion device, and an apparatus to make an energy conversion device, respectively.

3. Inventions of Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made using a different process, such as one not requiring the supply of energized ions to control the growth of the electrode material.
4. Inventions of Group III and Group IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make other semiconductor devices having different compositions than the photovoltaic device.
5. Inventions of Group IV and V are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus used to make the photovoltaic device is not an obvious apparatus to make the device and could be used to for coating objects not used for energy conversion.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Mr. Charles Lemaire on June 27, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian L. Mutschler whose telephone number is (703) 305-0180. The examiner can normally be reached on Monday-Friday from 8:00am to 4:30pm.
